## Mushahadah 2

Location	Date of Mushahadah	Arrival Time	Departure Time	Filled in By
Beacon Fell	Sunday 29 <sup>th</sup> June 2008	11.22 pm	11.45 pm	Moulana H Munshi

Ulama Present	Non Ulama Present
Moulana Javid	Hafiz Husen Munshi
Moulana Arif Polli	
Moulana Ahmed Bux	
Moulana Habibullah Munshi	

## Observations / Notes

Observations at 11.22 pm:

1. Conditions very cloudy.
2. However redness still clearly visible in through the gap in between 2 clouds.
3. Whiteness very clear despite clouds as the whiteness is evident up to quite high in the sky.

Observations at 11.42 pm:

1. Redness still visible in between the clouds.
2. Whiteness clearly visible.

Note:

The group decided to leave early to conduct observations from the seaside. Hence they went to St Annes and Blackpool but found that there were too many clouds. Hence they returned home.

## Mushahadah 4

Location	Date of Mushahadah	Arrival Time	Departure Time	Filled in By
Beacon Fell	Wednesday 16 <sup>th</sup> July 2008	11.08 pm	12.45 am	Moulana H Munshi

Ulama Present	Non Ulama Present
Moulana Javid	Hafiz Sajid Zinga
Moulana Arif Polli	
Moulana Imtyaz Kamal	
Moulana Habibullah Munshi	

## Observations / Notes

Observations at 11.08 pm

1. Redness visible in the gaps between dense clouds.
2. Whiteness clearly visible.

Observations at 11.35 pm

1. Black dense clouds covering redness. Redness still visible though.
2. Whiteness very clearly visible.

Observations at 12.45 am

1. Due to heavy cloud, redness not visible.
2. Whiteness still visible.

Hizbul Ulama Time	15 Degrees	18 Degrees
10.49 pm	01.03 am	Twilight remains

## Mushahahadah 5

Location	Date of Mushahahadah	Arrival Time	Departure Time	Filled in By
Beacon Fell	Saturday 19 <sup>th</sup> July 2008	10.53 pm	12.50 am	Moulana A Polli

Ulama Present	Non Ulama Present
Mufti Javid Pathan	Hafiz Sajid Zinga
Moulana Arif Polli	Naeem Taylor
	Hafiz Talha Rafique

### Observations / Notes

Observations at 10.53 pm

1. Redness clearly visible on the horizon.
2. Whiteness also clearly visible.

Observations at 11.15 pm

1. Redness on the horizon.
2. Whiteness also clearly visible.

Observations at 11.33 pm

1. Redness visible. However redness covered a little by clouds.
2. Whiteness visible

Observations at 11.47 pm

1. Redness visible between clouds as clouds have appeared.
2. Whiteness still visible.

Observations at 12.08 am

1. Dense clouds present. Redness still visible but not as distinct as at the start.
2. Whiteness visible.

Observations at 12.19 am

1. Due to very dense clouds covering the redness, the redness is not visible.
2. Whiteness still visible.

Observations at 12.37 am

1. Clouds cleared. However redness *not* visible.
2. Whiteness clearly visible.

Observations at 12.45 am

1. Heavy clouds closing in once more. However whiteness visible.

Hizbul Ulama Time	15 Degrees	18 Degrees
10.44 pm	12.33 am	Twilight remains

## Mushahadah 9

Location	Date of Mushahadah	Arrival Time	Departure Time	Filled in By
Beacon Fell	Saturday 13 <sup>th</sup> September 2008	8.00 pm	9.10 pm	Moulana A Polli

Ulama Present	Non Ulama Present
Moulana Arif Polli	Naeem Taylor
Moulana Javid	

## Observations / Notes

Observations at 8.00 pm

- Redness clearly visible.
- Whiteness clearly visible.

Observations at 8.53 pm

- Intensity of redness decreasing.
- Whiteness clearly visible.

Observations at 8.58 pm

- Density of redness decreasing further.
- Whiteness clearly visible.

Observations at 9.06 pm

- No redness now visible due to thin line of cloud on horizon.
- Whiteness still visible.

Hizbul Ulama Time	15 Degrees	18 Degrees
8.49 pm	9.12 pm	9.35 pm

## Mushahadah 10

Location	Date of Mushahadah	Arrival Time	Departure Time	Filled in By
Beacon Fell	Wednesday 24 <sup>th</sup> September 2008	8.20 pm	9.00 pm	Moulana F Kazi

Ulama Present	Non Ulama Present
Moulana Arif Polli	
Moulana Farook	

## Observations / Notes

Observations at 8.20 pm

- Redness clearly visible.
- Whiteness clearly visible.

Observations at 8.30 pm

- Intensity of redness decreasing but still visible.
- Whiteness clearly visible.

Observations at 8.35 pm

- No redness visible.
- The disappearance of whiteness is very difficult to determine due to clouds also being white.

General notes:

1. Mushahadah is much more difficult in winter due to the cloud cover on the horizon.
2. Observers have noticed a shift in the sunset place in winter towards the left (comparing to the sunset place in summer).

Hizbul Ulama Time	15 Degrees	18 Degrees
8.27 pm	8.41 pm	9.03 pm

## Mushahadah 11

Location	Date of Mushahadah	Arrival Time	Departure Time	Filled in By
Lytham St Annes	Sunday 5 <sup>th</sup> October 2008	6.58 pm	8.40 pm	Moulana H Munshi

Ulama Present	Non Ulama Present
Moulana Arif Polli	
Moulana Mohammed Javid	
Moulana H Munshi	

### Observations / Notes

Observations at 6.58 pm

- Redness and whiteness clearly visible.

Observations at 7.30 pm

- Redness and whiteness still clearly visible.

Observations at 7.40 pm

- Decrease in redness, however still clearly visible.
- Whiteness clearly visible.

Observations at 7.48 pm

- Redness and whiteness decreasing.

Observations at 8.05 pm

- Redness becoming lighter.
- Whiteness still clearly visible.

Observations at 8.08 pm

- Redness becoming more lighter yet visible.
- Whiteness still visible.

Observations at 8.09 pm

- Redness disappeared according to Moulana Arif & Moulana Habibullah.
- Whiteness still visible.

Observations at 8.12 pm

- Redness disappeared according to Moulana Javid..
- Whiteness still visible.

Observations at 8.21 pm

- Whiteness still visible.

Observations at 8.25 pm

- Whiteness very faint.

Observations at 8.26 pm

- Whiteness disappeared according Moulana Arif & Moulana Habibullah.

Observations at 8.33 pm

- Whiteness disappeared according to Moulana Javid. Total darkness now apparent.

Other:

Moonset was witnessed at 8.53 pm. This was precise with observatory calculation.

Hizbul Ulama Time	15 Degrees	18 Degrees
8.02 pm	8.13 pm	8.34 pm

## Mushahadah 12

Location	Date of Mushahadah	Arrival Time	Departure Time	Filled in By
Lytham St Annes	Sunday 26 <sup>th</sup> October 2008	7.00 pm	7.30 pm	Moulana H Munshi

Ulama Present	Non Ulama Present
Moulana Mohammed Javid	
Moulana H Munshi	

### Observations / Notes

Observations at 7.00 pm

- Too many clouds on horizon.
- Also rainfall.

This despite the horizon seeming clear at 7.00 pm from Preston.

Left at 7.30 pm as Mushahadah seemed impossible.

Hizbul Ulama Time	15 Degrees	18 Degrees
6.19 pm	6.27 pm	6.47 pm

Location	Date of Mushahadah	Arrival Time	Departure Time	Filled in By
Lytham St Annes	Saturday 6 <sup>th</sup> Dec 08	4.18 pm	6.00 pm	Moulana H Munshi

Ulama Present	Non Ulama Present
Moulana Mohammed Javid	Azhar Khan
Moulana A Polli	
Moulana H Munshi	
Mufti J Pathan	

### Observations / Notes

Observations at 4.18 pm

- Redness extremely clearly visible as sunset was only 20 minutes before.
- Whiteness clearly visible.
- Conditions almost perfect although it is extremely chilly (cold)!

Observations at 5.00 pm

- Redness still visible.
- Whiteness still visible.

Observations at 5.30 pm

- Redness much fainter and appearing just above the horizon.
- Whiteness still clearly visible.

Observations at 5.35 pm

- Redness fainter still and appearing just above the horizon.
- Whiteness still clearly visible.

Observations at 5.38 pm

- Redness disappeared according to Moulana Javid.
- Very faint redness still there according to Moulana H Munshi and Mufti Javid.
- Brother Azhar unsure.
- Whiteness clearly visible to ALL.

Observations at 5.40 pm

- Redness disappeared according to Moulana H Munshi and Mufti Javid.
- Whiteness still clearly visible.

Observations at 5.51 pm

- Whiteness visible but fainter.

Observations at 6.00 pm

- Due to the brightness of the moon very high in the sky it is extremely difficult to observe the phenomenon of the disappearance of whiteness due to the brightness of the moon becoming mixed with the whiteness.
- This did not occur with the redness as the moon was farther away from the sunset place, hence not interfering with the red twilight.

Hizbul Ulama Time	15 Degrees	18 Degrees
5.31 pm	5.41 pm	6.02 pm

### Observations / Notes

Observations at 4.13 pm

- Redness visible but cloud on horizon.
- Whiteness clearly visible.

Observations at 5.00 pm

- Redness still visible but cloud still on horizon.
- Whiteness still visible.

Observations at 5.16 pm

- Redness apparent on the horizon despite clouds and also through the gaps between the clouds present.
- Whiteness still clearly visible.

Observations at 5.25 pm

- Redness faintly apparent on the horizon despite clouds and also through the gaps between the clouds present.
- Whiteness still clearly visible.

Observations at 5.30 pm

- Redness has moved behind the dense cloud on the horizon.
- Whiteness still clearly visible.

Observations at 5.43 pm

- Due to the brightness of the moon very high in the sky it is extremely difficult to observe the phenomenon of the disappearance of whiteness due to the brightness of the moon becoming mixed with the whiteness.
- This did not occur with the redness as the moon was further away from the sunset place, hence not interfering with the red twilight.

### Observations / Notes

Observations at 3.58 pm

- Redness extremely clearly visible as sunset was only 8 minutes before.
- Whiteness clearly visible.
- There is a dense black cloud across the horizon.

Observations at 4.26 pm

- Redness still clearly visible.
- Whiteness still visible.

Observations at 4.58 pm

- Redness fainter than before but still visible.
- Whiteness still clearly visible.

Observations at 5.15 pm

- Redness fainter than before.
- Whiteness still clearly visible.

Observations at 5.21 pm

- Very faint redness on top of the dense cloud which is on the horizon.
- Whiteness still clearly visible.

Observations at 5.28 pm

- According to Mufti Javid and Moulana Javid the redness has moved *behind the cloud*.
- Whiteness still clearly visible.

Observations at 5.30 pm

- According to Moulana Habibullah and Moulana Arif the redness has moved *behind the cloud*.
- Whiteness still clearly visible.

Observations at 5.38 pm

- Whiteness visible.

Observations at 5.40 pm

- Due to the brightness of the moon very high in the sky it is extremely difficult to observe the phenomenon of the disappearance of whiteness due to the brightness of the moon becoming mixed with the whiteness.
- This did not occur with the redness as the moon was further away from the sunset place, hence not interfering with the red twilight.

### Observations / Notes

Observations at 5.47 pm

- Thick line of cloud on the horizon, hence the redness cannot be seen at all.
- Whiteness clearly visible in the sky.

Observations at 6.00 pm

- Whiteness visible.

Observations at 6.05 pm

- Due to the brightness of the moon very high in the sky it is extremely difficult to observe the phenomenon of the disappearance of whiteness due to the brightness of the moon becoming mixed with the whiteness. Infact we feel that there was more whiteness on the horizon at 6.05 pm than at 6.00 pm.
